

Guide Dogs for the Blind - Breeding Stock Program

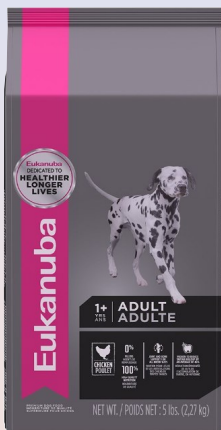

Dog Food

Updated June 2019

Greetings Volunteer Breeding Stock Custodian,

- The recommended maintenance formulas are **Eukanuba Adult regular size bites, chicken**, which is the same formula as **Eukanuba Adult medium breed, chicken**.
- The snapshots below are the various recommended formulas for the breeder dog's life stages and weight control. We will use these diets when the breeder dog is boarding at Guide Dogs.
- During pregnancy and lactation, Guide Dogs requires that each brood be fed Eukanuba small breed puppy
- If your dog is eating a prescription food approved by the Veterinary Clinic, and is doing well, please disregard this notice.
- If you would like to talk about alternative diet options, please contact the breeding staff.

Thank you for your continued support!
