Annual Boosters*	Due: X	Due: X	Due: X	Due: X	Due: X	Due: X	
	Given:	Given:	Given:	Given:	Given:	Given:	
AFTER ANNUAL BOOSTERS ARE GIVEN, PLEASE SEND UPDATED ANNUAL VACCINE AND RABIES CERTIFICATE to ipuppy@guidedogs.com Please send Alter/Rabies Certificate in PDF format							

- **ANNUAL BOOSTERS:** DA2PP, Bordetella, Rabies, Influenza, Leptospirosis, and a Heartworm test.
 - *It is CRITICAL to have the Rabies vaccine given by its due date (it can be given up to 30 days prior). If the dog is late for its Rabies booster, it creates regulatory issues that may involve quarantine, inability to travel, and duration of immunity.*
 - The other annual vaccine boosters should be given when due and can be combined with the Rabies booster. The Heartworm test can be done if needed to refill the Heartgard prescription. GDB will complete a heartworm test at recall.
- The Bordetella vaccine will expire prior to the timing of the rest of the annual boosters. It is ok for this vaccine to lapse unless a dog is going to be boarded in a commercial kennel; in that case, the dog should receive the vaccine prior to being boarded.
- Corona virus or Lyme disease vaccines are not recommended and will not be reimbursed.
- Recall information: Dogs should never arrive on campus with expired vaccines. All vaccines due within 30 days of recall should be given before the dog arrives at GDB. Records for vaccines done within 30 days of recall need to be submitted as soon as possible to ipuppy@guidedogs.com.
